

Homework 7
MTH 4230, Spring 2020
Due Monday, Apr. 13

Chapter in Book	Problems
9	9.9*, 9.10 (skip part <i>a</i>), 9.11**, 9.18**

* For **Problem 9.9**, fit models containing all subsets of the predictors X_1 , X_2 , and X_3 (eight models total including the one with just an intercept). To compute the model selection criteria, see **R Notes 8** on the course website.

** For **Problems 9.11** and **9.18**, see **R Notes 9** on the course website.
